

Engenia®

Herbicide

Summary of Application Requirements

Valid in All Registered States Except: AR, IA, IL, IN, MN, SD

- Engenia® herbicide can only be used for pre-plant, pre-emergence and post-emergence applications on dicamba-tolerant soybeans and cotton.
- The use of a pH buffering adjuvant, like AEGOS™ or Sentris™ Buffering Technology, is mandatory for all dicamba applications on DT crops.
- Certified applicator record keeping form will include an area where the name of the pH buffering agent and use rate are to be recorded.
- National dicamba application cut-off dates:
 - Soybeans: June 30th
 - Cotton: July 30th
- Soybeans and cotton will be limited two over-the-top applications per season. Engenia herbicide can also be used pre-emergence, but annual cumulative use rate limit of 51.2 fl oz/A remains.
- The downwind buffer outside of identified endangered species areas is 240 ft; if wind changes direction, the applicator can return and treat the initial downwind buffer to the field edge.
- In endangered species areas, the downwind buffer is 310 ft. Endangered species counties have changed. Consult www.epa.gov/espp or call 1-844-447-3813 no more than six months prior to making the intended Engenia herbicide application and follow any county specific dicamba use restrictions for corresponding endangered species.
- Use of an approved Redball-Hooded™ Sprayer will reduce the downwind buffer to 110 ft in non-endangered species counties and 240 ft in endangered species counties in soybeans, only. Refer to www.engeniatankmix.com for a list of approved sprayer models.
- **DO NOT** apply if you have not checked www.engeniaherbicide.com/labels no more than 7 days before application of this product for additional labeling, including state restrictions. Where applicable, users must comply with additional requirements found on this website.
- Applicators must maintain a copy of the product label and any labeling that supplements the product label.

This summary is not a substitute for the product label. Always read and follow label directions. Additional state restrictions may apply. Engenia Herbicide is a US EPA Restricted Use Pesticide.
